CLAVEL STEEL KONSTRUCTION COMPANY LTD

Comprehensive Company Profile

Creating your structure... | Your Trusted Partner in Steel Excellence.

1. Company Overview

Clavel Steel Konstruction Company Ltd is a steel construction and metal fabrication company based in Awka, Anambra State, Nigeria, providing specialized solutions across steel construction, structural fabrication, roofing, industrial structures, storage systems, tanks, security installations, welding, transportation-related steelwork, and steel/aluminium materials supply.

The company's public-facing materials position it around steel excellence, practical fabrication expertise and dependable structural solutions. Its brand message is “We are your trusted partner in Steel Excellence,” supported by the tagline “Creating your structure...”

Public business listings classify Clavel under steel/metal construction, with its Awka, Anambra location associated with Nwude Eugene.

2. Company Identity

Company Name	Clavel Steel Konstruction Company Ltd
Industry	Steel Construction, Metal Fabrication & Engineering Support
Primary Location	Awka, Anambra State, Nigeria
Business Category	Steel / Metal Construction
Primary Contact Person Listed Publicly	Nwude Eugene
Brand Tagline	Creating your structure...
Brand Promise	Your Trusted Partner in Steel Excellence.

3. Company Description

Clavel Steel Konstruction Company Ltd specializes in the design, fabrication, construction, installation and supply of steel-based solutions for residential, commercial, industrial and infrastructure-related applications.

The company's published service material demonstrates capabilities covering general steel construction, industrial structures, warehouses, filling-station canopies, underground tanks, overhead and storage tanks, stanchions, trailer/tank-related fabrication, steel and aluminium roofing, burglary-proof systems, rails and gates, as well as professional welding training.

The company also identifies expertise in SMAW/MMA (Shielded Metal Arc Welding / Manual Metal Arc Welding) and GTAW/TIG (Gas Tungsten Arc Welding / Tungsten Inert Gas).

4. What the Company Does

• **Steel Construction & Structural Fabrication** — General steel construction, structural steelwork, industrial structures, warehouse structures, steel framework, steel installations and custom fabricated structural components.

• **Industrial & Commercial Structures** — Warehouses, industrial structures, filling-station canopies and functional steel structures for commercial applications.

• **Roofing & Architectural Metalwork** — Steel roofing, aluminium roofing, roofing support structures, canopies, rails and other fabricated architectural components.

• **Tanks & Storage Solutions** — Overhead tanks, storage tanks, stanchions, underground tanks and related fabrication.

• **Security & Protective Steelwork** — Burglary-proof systems, security rails, steel gates, steel doors and related protective metalwork.

• **Welding Training & Materials Supply** — Professional welding training in SMAW/MMA and GTAW/TIG, plus sales and distribution of steel and aluminium materials.

5. Detailed Service Portfolio

Steel Construction: Structural steel fabrication, steel framework, industrial steel structures, warehouse construction, fabrication and installation.

Industrial Structures: Industrial buildings, production structures, steel platforms, equipment support structures, industrial sheds and storage facilities, subject to project scope.

Warehouse Construction: Steel warehouse structures designed around practical requirements such as durability, efficient construction and adaptable internal layouts.

Filling Station Canopies: Fabrication and installation of steel canopy structures for filling-station and related commercial applications.

Tank Fabrication & Installation: Underground tanks, overhead tanks, storage tanks, tank support systems and stanchions. Specifications and compliance requirements should be confirmed project-by-project.

Roofing Solutions: Steel roofing and aluminium roofing, including associated structural and fabricated components.

Canopies: Custom canopy fabrication for commercial, industrial, filling-station and property applications, subject to design requirements.

Security Steelwork: Burglary-proof systems, gates, doors, rails and other protective fabricated metalwork.

Transportation-Related Steelwork: Trailer truck and tank-related fabrication as identified in the company's promotional material.

Steel & Aluminium Materials Supply: Sales and distribution of steel and aluminium materials.

Welding Expertise & Training: SMAW/MMA and GTAW/TIG welding training and practical fabrication capabilities.

6. Target Clients

Residential clients: homeowners, property developers, landlords and residential contractors.

Commercial clients: commercial property owners, retailers, office developments and facility operators.

Industrial clients: industrial facilities, manufacturers, warehouses, processing businesses and equipment operators.

Construction professionals: building contractors, civil contractors, architects, engineers and project managers.

Institutional clients: schools, churches, offices, community organizations and other institutions requiring steel structures and security installations.

Fabricators and tradespeople: welders, metal fabricators, construction workers, technical trainees and businesses purchasing steel/aluminium materials.

7. Competitive Positioning

• **Steel Specialization** — A clear specialization in steel construction and fabrication rather than a generic building-contractor position.

• **Broad Technical Capability** — Construction, fabrication, welding, roofing, tanks, security, materials supply and training.

• **Industrial Capability** — Published services include warehouses, industrial structures, tanks and filling-station canopies.

• **Materials + Fabrication** — Combining materials supply with fabrication can simplify procurement for suitable customers.

• **Skills Development** — Professional welding training adds a workforce-development component to the business.

8. Brand Personality

The visual identity communicates a technical, industrial and engineering-oriented personality. The logo combines a circular metallic mechanical structure, prominent green “CSK” lettering and a yellow welding/spark motif.

The overall brand language communicates strength, technical skill, fabrication, reliability, industrial capability and steel excellence.

9. Recommended Mission Statement

To deliver reliable, durable and professionally fabricated steel solutions that meet the structural, industrial, commercial and security needs of our clients, while promoting technical excellence, quality workmanship and practical innovation in steel construction.

10. Recommended Vision Statement

To become a trusted and respected steel construction and fabrication company recognized for technical excellence, dependable workmanship, innovative steel solutions and professional service across Nigeria.

11. Core Values

• **Quality** — Commitment to durable materials, careful fabrication and quality workmanship.

• **Reliability** — Delivering practical steel solutions clients can depend upon.

• **Technical Excellence** — Applying professional fabrication and welding skills to project requirements.

• **Safety** — Promoting responsible construction, fabrication and installation practices.

• **Integrity** — Maintaining honest and professional relationships with customers and partners.

• **Innovation** — Developing practical steel solutions suited to individual project requirements.

• **Customer Satisfaction** — Understanding client requirements and delivering solutions aligned with their needs.

12. Geographic Base

Clavel Steel Konstruction Company Ltd is based in Awka, Anambra State, Nigeria. The available information does not establish a definitive nationwide operating footprint, so public materials should avoid claiming nationwide operations unless the company confirms this.

15. Recommended Website About-Us Description

Clavel Steel Konstruction Company Ltd is a specialized steel construction and fabrication company based in Awka, Anambra State, Nigeria. We provide practical and dependable steel solutions for residential, commercial and industrial applications, combining fabrication expertise, welding skills and materials supply to deliver structures and metalwork built for purpose.

Our capabilities cover general steel construction, industrial structures, warehouses, filling-station canopies, roofing, underground and storage tanks, overhead tanks, stanchions, security steelwork, gates, doors, rails, trailer and tank fabrication, as well as steel and aluminium materials supply. We also provide professional welding training in SMAW/MMA and GTAW/TIG.

At Clavel Steel Konstruction Company Ltd, our goal is to provide clients with quality steel solutions through professional workmanship, technical competence and attention to project requirements. From structural fabrication to roofing, storage, security and industrial applications, we aim to be a trusted partner throughout the process.

Creating your structure. Delivering steel excellence.

16. Recommended Short Company Introduction

Clavel Steel Konstruction Company Ltd is an Awka-based steel construction and fabrication company specializing in structural steelwork, industrial structures, warehouses, roofing, tanks, storage solutions, security metalwork, welding and steel/aluminium materials supply. We combine practical fabrication expertise with professional welding capabilities to deliver durable steel solutions for diverse construction and industrial applications.

17. Recommended Tagline Options

Primary: Creating your structure...

Supporting: Your Trusted Partner in Steel Excellence.

Alternative options: Built in Steel. Built to Last.; Engineering Strength. Creating Structures.; Steel Solutions. Built with Excellence.; Strength in Every Structure.; From Steel to Structure.; Fabricating Strength. Building Excellence.

18. Recommended Website Service Architecture

• **Steel Construction** — General steel construction, structural steelwork and fabricated structures.

• **Industrial Structures** — Warehouses, industrial buildings, frameworks and specialized steel installations.

• **Roofing & Canopies** — Steel roofing, aluminium roofing and custom canopy systems.

• **Tanks & Storage** — Overhead tanks, storage tanks, underground tanks and stanchions.

• **Security Steelwork** — Burglary-proof systems, gates, doors and protective rails.

• **Welding & Fabrication** — Professional steel fabrication and SMAW/MMA and GTAW/TIG welding capabilities.

• **Transportation Steelwork** — Trailer and tank-related fabrication.

• **Steel & Aluminium Supply** — Sales and distribution of steel and aluminium materials.

• **Welding Training** — Professional practical training in SMAW/MMA and GTAW/TIG welding.

19. Overall Company Profile Summary

Clavel Steel Konstruction Company Ltd can be presented as a specialist steel construction, fabrication and industrial solutions company headquartered in Awka, Anambra State, Nigeria.

Its core strength lies in providing multiple complementary steel-related services—from structural construction and industrial fabrication to roofing, tanks, security installations, welding training and materials supply.

The company's strongest positioning should not be simply “welding company” or “metal works.” A more professional positioning is: “A specialist steel construction and fabrication company delivering structural, industrial, roofing, storage, security and steel-material solutions.”

20. Verification & Publishing Note

This profile deliberately separates verified information from recommended professional positioning language. The company should confirm its founding year, employee count, major completed projects, certifications, professional memberships, client names, project values, regulatory approvals, operating footprint and final contact details before these are presented as factual claims on a public website.

The five project images referenced in the uploaded RAR archive could not be extracted in this environment because the archive uses RAR compression. No project-specific claims have been invented from those inaccessible images.
